

Bristol regional food network - digital marketplace website

Contribution report

Module title: Distributed and Enterprise Software Development

Module code: UFCFTR-30-3

Assessment type: Group project with demonstration

Academic year: 2025 - 2026

Group number: 2

Members' names & IDs:

Nguyen Quang Manh - 23085486

Nguyen Nhat Minh – 23085488

Nguyen Quoc Hung - 23085485

Technical component contributions

Technical component	Manh	Hung	Minh	Total
Requirements analysis, documentation, and project management	45%	40%	15%	100%
Database schema design & implementation	60%	30%	10%	100%
Django model classes development	85%	15%	0%	100%
Views, controllers & backend logic	65%	30%	5%	100%
Template design & frontend development	15%	5%	80%	100%
Form handling & data validation	75%	15%	10%	100%
User authentication system	15%	85%	0%	100%
User authorization & permissions	30%	70%	0%	100%
Session management implementation	30%	70%	0%	100%
CRUD operations development	60%	30%	10%	100%
AI micro-service integration & model operations	35%	5%	60%	100%
Payment, webhooks, refund, and external API integration	20%	80%	0%	100%
Marketplace business logic & order workflow	60%	30%	10%	100%
AI/platform administration & operational tooling	45%	25%	30%	100%
Deployment infrastructure & service orchestration	30%	0%	70%	100%
Docker containerization setup	20%	0%	80%	100%
Docker multi-container architecture	35%	0%	65%	100%
Bug fixes & system debugging	70%	10%	20%	100%
Performance optimization	75%	10%	10%	100%
User interface & user experience	30%	10%	60%	100%
REST API & backend service development	75%	20%	5%	100%
Git management & branch integration	70%	15%	15%	100%

Overall contribution summary

Member	OCP	Justification
Manh	40%	Led the overall backend architecture and integration of the distributed marketplace platform. Took primary responsibility for database design, Django models, backend business logic, REST APIs, marketplace workflows, recurring-order functionality, operational tooling, performance optimization, and large-scale debugging/integration work across the system. Also contributed to AI-service integration, deployment coordination, Git branch integration, and final system stabilization to ensure all distributed components operated consistently in the final demo environment.
Hung	28%	Led the complete payment-processing subsystem and contributed heavily to authentication, authorization, session management, and technical documentation across the platform. Implemented Stripe Checkout integration, webhook handling, refund workflows, payment/order state management, and related external API integration features. Also contributed to backend logic, CRUD operations, security/access-control features, environment configuration, testing guidance, and project documentation to support reliable deployment and reproducible evaluation.
Minh	32%	Led frontend development, deployment infrastructure, Docker containerization, and multi-container orchestration for the distributed application. Implemented the majority of the user-facing templates, interface flows, and overall user experience, while also configuring Docker Compose, nginx routing, and deployment/service orchestration. Contributed significantly to AI micro-service integration, operational tooling, frontend refinement, interface usability improvements, and deployment consistency across environments.
Total	100%	

** OCP (column 2 header) stands for Overall Contribution Percentage.*

Group agreement & verification

I. Discussion record

1. **Date of contribution discussion:** 15/05/2026
2. **Meeting duration:** 30 minutes
3. **All members present:** Yes

4. **Conflict resolution:** There were no unresolved disagreements regarding project contributions.

II. Verification checklist

1. We have reviewed Git commit history for each member: Yes
2. We have discussed time investment and workload distribution: Yes
3. All contributions have been verified and agreed upon: Yes
4. All percentages reasonably reflect actual work performed: Yes

III. Group consensus declaration

We, the undersigned, confirm that:

1. All contribution percentages have been thoroughly discussed and agreed upon.
2. The percentages reasonably reflect each member's actual contribution to the project.
3. We are fully aware that these percentages will determine individual marks.
4. We take collective responsibility for the accuracy of this assessment.
5. Any future disputes will be handled through proper academic channels.

All members' signatures & date

Student name	Role	Signature	Date
Nguyen Quang Manh	Leader, developer		15/05/2026
Nguyen Quoc Hung	Developer		15/05/2026
Nguyen Nhat Minh	Developer		15/05/2026
